## WARRANTIES

### 3 years / 60,000 km

Bumper-to-bumper, no  
deductible limited warranty.

### 5 years / 100,000 km

Major components and powertrain.

### 3 years / unlimited km

CAA roadside assistance.

Extended service contract  
available at extra cost.

See warranty book for details and limitations.

With a great model lineup to suit your business needs, it simply makes sense to add the safety, value and reliability of Subaru symmetrical full-time All-Wheel Drive vehicles to your fleet. Thanks to the Subaru symmetrical full-time All-Wheel Drive system, all Subaru vehicles are uniquely equipped to offer unsurpassed control and safety in all types of weather conditions and on all types of road surfaces. Affordable acquisition costs, high residual value and volume fleet incentives make Subaru vehicles an excellent value and a smart investment. With the all-weather safety of All-Wheel Drive, outstanding value and the reliability of Subaru engineering, Subaru vehicles will make a welcome and intelligent addition to any business.

## 2011 MODEL YEAR FLEET ASSISTANCE PROGRAM

- Fleet program allowances apply only to commercial fleet accounts approved and registered with Subaru Canada, Inc.
- Fleet program allowances (credits) are passed through to the purchaser and are shown as a distinct line item on the bill of sale.
- Special fleet concessions (bid assistance) may be available in lieu of the published program for volume purchases. This will be done on a "stair step" system, and will be available retroactively based on vehicles actually purchased. All fleet concessions must be pre-approved in writing by the Director, National Fleet Sales and Marketing.

<b>Impreza (except STI)</b>	<b>\$1,250</b>
<b>Legacy</b>	<b>\$1,250</b>
<b>Forester</b>	<b>\$1,250</b>
<b>Outback</b>	<b>\$1,250</b>
<b>Tribeca</b>	<b>\$1,250</b>

*Fleet assistance programs do not  
apply to Impreza WRX STI.*

## Do You Qualify as a Fleet Customer?

To qualify, a fleet customer must have five (5) vehicles registered in the company's name and a Fleet Account Number (FAN) approved by and registered with Subaru Canada, Inc.

## How to Apply for a Fleet Account Number (FAN)

To apply for a Fleet Account Number, please select the appropriate form which may be downloaded from [www.fleet.subaru.ca](http://www.fleet.subaru.ca). The completed application form, along with the required number of proof of vehicle registrations, is then forwarded to Subaru Canada, Inc. When the application and support documents are verified and approved by Subaru your company will be registered and a Fleet Account Number provided.

## FAN Application Forms

### Leasing Company Account FAN Application Form

Leasing Company: Please include copies of ten (10) vehicle provincial registrations that provide both Lessor and Lessee names. The registrations should include two (2) that are dated at least six (6) months prior to the application date.

### Commercial Account FAN Application Form

Commercial Account: Please include copies of five (5) vehicle provincial registrations.

### Daily Rental Account FAN Application Form

Daily Rental: Please include copies of five (5) vehicle provincial registrations.

## FAN Requirements

The vehicles you are purchasing or leasing must remain in original service in Canada and are to be used in the operation of the business for a minimum of 12 months, except daily rental companies for which there is a minimum 6-month in-service requirement. Vehicle registrations can be for any make or model but they are to be for cars or trucks only. In provinces with government insurance, we alternatively accept a copy of a vehicle listing issued by the governing authority in lieu of individual registrations.

# SUBARU CORE TECHNOLOGY

## SUBARU SYMMETRICAL FULL-TIME ALL-WHEEL DRIVE

At Subaru, we have been building all-wheel-drive vehicles since 1972. Currently, our entire vehicle lineup enjoys the benefits of this advanced approach to vehicle dynamics. The result of such foresight and commitment? The development and perfection of Subaru symmetrical full-time AWD. In this layout, all drivetrain components – the engine, transmission, driveshaft, and front and rear differentials – are logically aligned close to the centre point of the vehicle. This gives every Subaru vehicle heightened stability and excellent weight distribution, front to rear and side to side. This unique system is a bilaterally balanced, simple design not only providing exceptionally efficient power delivery and a lower centre of gravity, but also better fuel economy and fewer maintenance requirements compared to other 4WD or AWD systems. Engineered to be an AWD vehicle from the start allows for the symmetrical design of the drivetrain and the ability to deliver greater grip and quicker response to changing conditions. In addition, if any wheel senses slippage, the torque distribution between the front and rear is controlled automatically to maintain optimal traction at all four wheels. The result: Permanent reassurance that you are driving a vehicle famed for its inherent balance, stability and control in a variety of driving conditions.

## THREE DISTINCT ADVANTAGES

### Increased grip

If your vehicle has four wheels, it makes sense that all four wheels should play a role in keeping that vehicle planted on the road. But in front- and rear-wheel-drive vehicles, two of the four wheels are essentially just passengers along for the ride. By transmitting power through all four wheels instead, vehicles equipped with Subaru symmetrical full-time AWD offer increased grip, stability, control and safety – regardless of road or weather conditions.

### Lower centre of gravity

Subaru vehicles are built from the ground up to have an extremely low centre of gravity, the cornerstone of this design being the SUBARU BOXER engine placed low in the chassis. This layout, in turn, leads to reduced body roll along with improved handling and stability, without the need for an overly stiff suspension system.

### Reduced vibration

With its 180-degree, horizontally opposed configuration, the SUBARU BOXER engine design cuts vibration dramatically by eliminating the inertia of opposing pistons as found in V-shaped or in-line engine configurations. The result of this innovative engine design is instant responsiveness throughout the rev range, unprecedented smoothness and greatly improved vehicle stability. In addition, less engine vibration also creates a more peaceful and relaxing passenger cabin.

## LINEARTRONIC® CVT + MULTI-PLATE TRANSFER CLUTCH AWD

Subaru's Lineartronic® CVT (Continuously Variable Transmission) has evolved beyond traditional CVTs to become a production-car first: a CVT longitudinally paired with AWD that uses a chain instead of a belt for smooth acceleration, improved fuel efficiency and enhanced performance.

Continuously variable transmissions offer a near infinite selection of gear ratios for stepless acceleration, eliminating shift delay and keeping the engine in the most favourable rpm range at all times. This design creates improved performance and efficiency as well as faster response to throttle input.

But Subaru's Lineartronic CVT takes this technology to the next level: this transmission is specifically tuned to provide a more natural feel than other designs for instant response on demand with minimal application of the accelerator pedal. Its sophisticated programming improves both driveability and fuel efficiency with acceleration mapping that's based on driver input and driving conditions.

By employing a chain instead of a belt, the Lineartronic CVT eliminates the slippage found in other transmissions to enhance efficiency. This chain-driven system has a smaller wound diameter, allowing it to use smaller pulleys but still offer the same ratio coverage as traditional belts, resulting in a lighter transmission and enhancing fuel efficiency even further.

A Manual Mode setting – via centre console shifter or steering wheel-mounted paddle shifters – gives manual driving enthusiasts even more control: By simulating a 6-speed manual transmission drivers can select the correct engine speed more easily.

Available on select Subaru Legacy and Outback models, this is the transmission of choice for those who want instant, seamless response to changing conditions while keeping performance, smoothness and efficiency in perfect balance.

## PARTIAL ZERO EMISSION VEHICLE

### What is a PZEV?

A Partial Zero Emission Vehicle (PZEV) has been defined by the California Air Resources Board as one that meets the state's Super Ultra Low Emission Vehicle (SULEV) tailpipe standard and produces zero evaporative emissions. A PZEV is one of the cleanest-running gasoline-powered vehicles around. In fact, pollution controls are so stringent and the fuel-burning process is so complete, the exhaust produced can actually be cleaner than the air outside. In certain cases, a PZEV is even cleaner than some hybrid or alternative fuel vehicles. PZEV options are available on the Legacy, Outback and Forester. All three vehicles are also SmartWay® certified by the U.S. Environmental Protection Agency for achieving predetermined levels of tailpipe emissions and fuel efficiency.

### C.A.R.B. EMISSION STANDARDS

SCORE	DESIGNATION
10	Bin 1 & ZEV
9.5	PZEV
9	Bin 2 & SULEV II cars
8	Bin 3
7	Bin 4 & ULEV II cars
6	Bin 5 & LEV II cars
5	Bin 6 & LEV II option 1
4	Bin 7
3	Bin 8 & SULEV II trucks
2	ULEV II trucks
1	LEV II trucks
0	–

These standards rate any vehicle's emissions based on testing for five major types of pollutants in vehicle exhaust:

- Carbon-containing compounds, including hydrocarbons
- Oxides of nitrogen, which combine with hydrocarbons to create ground level ozone and smog
- Particulate matter, tiny particles of solid matter that lodge in the lungs and deposit on buildings
- Carbon monoxide, a colourless, odourless, poisonous gas
- Formaldehyde, a lung irritant and carcinogen

In 2004, Subaru of Indiana Automotive, Inc. (SIA), the plant where the Subaru Legacy, Outback and Tribeca are manufactured, became the first U.S. assembly plant to directly landfill zero waste materials. This facility, over 800 acres in rural Indiana, is also the first automotive manufacturing site in the U.S. to be named a National Wildlife Federation Backyard Wildlife Habitat.

## SELECTED FEATURES

**Engine:** 2.5L SOHC, horizontally opposed, 4-cylinder SUBARU BOXER engine  
**Power:** 170 hp @ 6000 rpm **Torque:** 170 lb-ft @ 4400 rpm

**Emissions:** Meets Low Emission Vehicle (LEV2) standards

5-speed Manual Transmission (5MT) with Hill Holder system

4-speed Electronic Direct Control Automatic Transmission with Manual Mode (4EAT)

Subaru symmetrical full-time All-Wheel Drive

Airbags (SRS): Driver and front passenger dual-stage deployment

Airbags (SRS): Front seat side-impact

Airbags (SRS): Side curtain

Brakes: ABS, 4-channel/4-sensor/4-wheel

Brakes: Electronic Brake-force Distribution (EBD) and Brake Assist

Head restraints (front): Height-adjustable, active

Head restraints (front): Integrated

Security: Engine immobilizer system

Security: Keyless entry system with panic alarm

Traction Control System

Vehicle Dynamics Control system with lateral-g and yaw-rate sensor

Audio: AM/FM/CD/MP3/WMA system with 4 speakers

Audio: Advanced AM/FM/CD/MP3/WMA system with 6 speakers

Audio controls: Illuminated, steering wheel integrated

Auxiliary input: Audio source in armrest console

Bluetooth® hands-free system: Voice-activated with steering wheel-mounted controls

Cargo cover: Retractable <sup>1</sup>

Climate control: Air conditioning with air filtration

Climate control: Automatic

Cruise control: Steering wheel integrated

Door mirrors: Power-adjustable, foldable and heated (body colour)

Door mirrors: Power-adjustable, foldable and heated (body colour)	●	●

## SELECTED FEATURES

Fog lights: Multi-reflector halogen <sup>1</sup>

Gauges: Analog with red illuminated needles

Headlights: Auto-off with ignition switch

Interior: Ebony cloth

Interior: Leather seating surfaces

MediaHub: iPod®/USB audio integration and Bluetooth® streaming audio

Roof rack: Integrated crossbar brackets

Satellite radio: SIRIUS® Satellite Radio installed (free 3-month trial subscription included)

Seat (driver's): 6-way manually adjustable

Seat (front): Passenger, 4-way manually adjustable

Seats (front): Heated with high/low level settings

Seats (front): Rally-sport style

Seats (rear): 60/40-split, flat-folding

Side moulding: Aerodynamic side ground effects (body colour)

Steering wheel: Tilt-adjustable

Sunroof: Glass, power tilting and sliding with sunshade

Wheels: 16" x 6.5" steel with wheel covers, 8-spoke design

Wheels: 16" x 6.5" aluminum alloy, 12-spoke design

Wheels: 17" x 7" aluminum alloy, 10-spoke design

Windows (power): Driver's window auto down

Windshield: Wiper de-icer

The Supplemental Restraint System (SRS airbags) affords the driver and passenger additional protection in some collisions. This system provides supplemental protection only, and seatbelts must be worn in order to avoid injuries to out-of-position occupants upon airbag deployment. The combination of SRS and seatbelts provides the best protection in a serious accident.
