## **4 WHEEL ALIGNMENT**

**ENGINE BLOCK HEATER** 

at front grille

• Fits all Subaru models

Engine coolant kept at, or near normal

operating temperature resulting in instant

heat from car heater on cold winter mornings

• Lighter/warmer engine oil viscosity at start-up allowing much less load on vehicle's starter

Convenient household 3-way plug-in outlet

Includes installation (coolant extra if required)

- Inflate tires to correct air pressure values
- Align all four wheels to factory specifications (prevents premature tire wear)

## **AUTOMATIC TRANSMISSION SERVICE**

- Due at 72,000 km intervals
- Inspect for fluid leaks
- Drain old fluid and refill with
- Subaru SIX STAR (ATF-DEXTRON III) fluid
- Road test vehicle for proper operation of transmission

## **COVERAGE THAT LETS YOU ENJOY THE RIDE!**

As a Subaru owner, you have expectations for a pleasurable, trouble free ownership experience - now and into the future. Once your 36 month/60,000 km New Vehicle Limited Warranty period ends\* our Subaru Protection Plan can prolong your hassle free ownership experience with 3 levels of extended service contract coverage tailored to your needs:

- Powertrain Protection
- Major Protection
- Complete Protection (best level of coverage to complement the 60 month/100,000 km Major Component Limited Warranty)

This extended service contract offers comprehensive mechanical and electrical coverage and is designed specifically for new and near-new vehicles (vehicles still within 36 months and 60,000 km from original in service date). Other features and benefits of the Subaru Protection Plan include: • Inflation protection – for parts and labour costs; Budget protection – reduces unexpected repair bills; Rental allowance when your vehicle is kept overnight

- for covered repairs:
- Normal wear coverage on covered components;
- Tire Road Hazard Coverage on all plans;
- May increase resale value of your Subaru vehicle.

level of coverage that suit your budget and driving needs. Be sure to ask your Dealer for details or visit subaru.ca for more information.

\* If you already own a Subaru vehicle and it is still within the 36 month. 60.000 km New Vehicle Limited Warranty period. you are still eligible.

Service specials now accessible at www.subaru.ca All offers available at participating Subaru Dealers until March 31, 2007. Prices do not include applicable sales taxes. Ask your Dealer for details. Special price excludes ST

## Why You Should **Check Your Oil Regularly**

As a Subaru owner you are part of an elite group of driving enthusiasts.

We would like to remind you however, your Subaru is one of the most technologically advanced vehicles on the road today and requires regular maintenance, especially when it is driven enthusiastically, and particularly if your vehicle is equipped with a turbocharged engine.

In that light, we would like to outline for you, a procedure you should follow to check your engine oil level at least every second fuel fill. It is very important that your vehicle is at operating temperature and allow the vehicle to sit with the engine shut off for at least five minutes. This will allow the engine oil to completely drain into the oil pan, therefore giving you an accurate reading of just how much oil is in the engine.

If the oil is cold and not up to operating temperature you will get a false reading of the actual amount of oil in the engine, as a lot of the oil will not be able to drain into the oil pan due to the viscosity (thickness) of the oil.

An alternative to checking the oil level when the engine is at operating temperature, is to allow the vehicle to sit overnight, and in the morning, before starting the vehicle, check the oil level. This is the most accurate time to take a reading of the oil in the engine, as indicated on the engine oil dipstick, as all the oil in the engine has had time to drain down in the oil pan.

The engine oil level dipstick is located under the hood, and can be identified by the bright yellow handle with a symbol of an oil can on the top. (Refer to Section 11, Maintenance and Service, in your Owner's Manual for more detailed instructions)

> If the oil level is at, or below, the "add oil" mark on the dipstick, add just one (1) litre of oil and recheck the level after a few minutes. Avoid overfilling the engine. The level on the dipstick should NOT exceed the "full" mark on the dipstick, but should be above the "add oil" mark.

## **COOLING SYSTEM SERVICE**

- Drain and refill cooling system (every 48,000 km or 24 months) Pressure test cooling system and
- radiator cap
  - Inspect radiator, belts and hoses
  - Add Subaru Coolant Conditioner
  - Bring A/F strength to (-50°C)

### FRONT BRAKE SERVICE<sup>†</sup> **INCLUDING TIRE ROTATION**

 Install Subaru brake pads (SIX STAR on applicable models)
